Led by a diverse team of trained adult and peer facilitators, participants will develop an appreciation of their own identities, build effective cross-cultural communication skills, better understand the nature and development of effective strategies for social justice, and practice expression through the arts, while networking with their peers. This year's conference will be held December 3-5, 2015 in Tampa, FL. If you are interested in social justice work and moving the diversity and inclusion efforts forward for the MICDS community, please contact Ms. Erica Moore for an application. There will be four to six students selected to attend from the applications submitted. The application deadline is September 21st, 2015. Thank you!
